

Simplifying Global Trade

What does trade visibility look like today?

Data Access

Manual tracking and tracing

Dependence on vendors

Collaboration

Issue resolution via phone and email

Manual reporting and data sharing

Workflow Automation

Paying fees, removing holds and clearing customs

Auditing accessorial charges and paying via check

How is Terminal 49 improving visibility?

Data Access

Automated tracking and tracing of shipments on water and containers at terminal

SKU level visibility

Collaboration

Access for the whole team

Brokers and trucking vendors on a single platform

Workflow Automation

Automatic gate fee payments at terminals

Automated trucker payments

Actionable notifications

Instant reports: Container empty-in

What is the future of visibility?

Data Access

Data unification and portability

All visibility data in real-time in your system

Better analytics: make better, quicker business decisions

Collaboration

Internal and external collaboration on a single online platform

Find and work with new vendors online

Workflow Automation

Pay fees automatically: gate fees, customs, etc

Automated ISF filing

Automated appointment scheduling
