

Supply Chain Collaboration. *Redefined.*

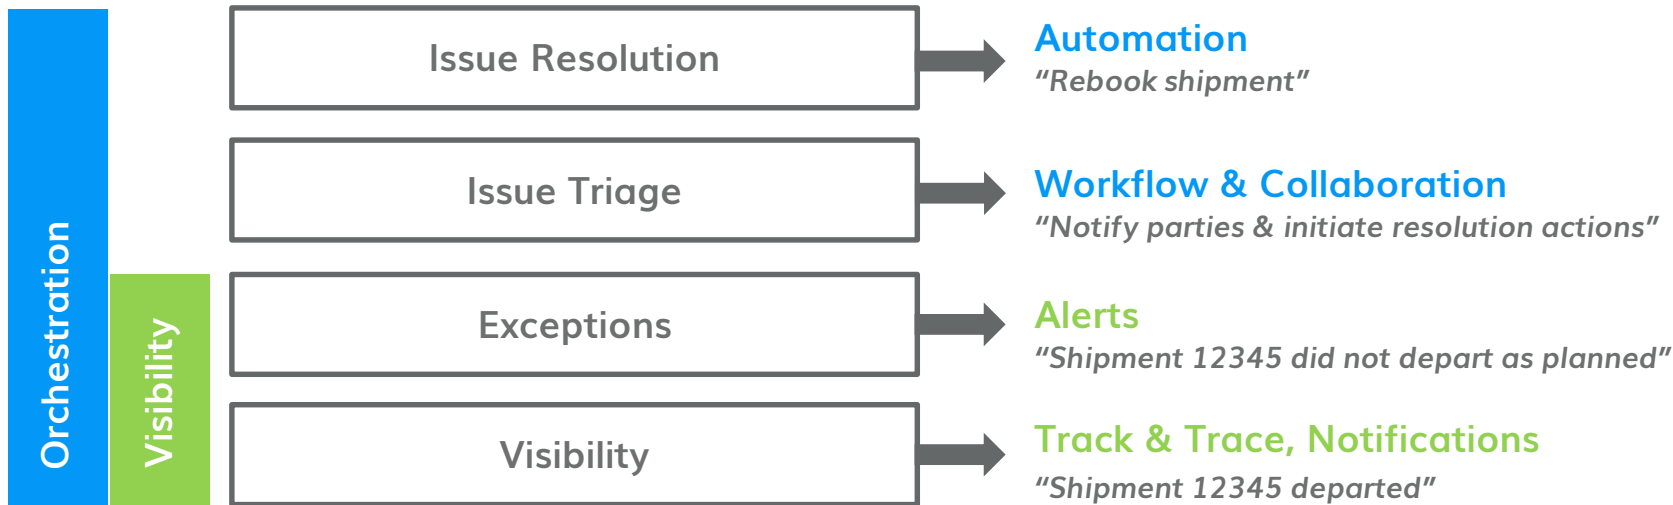

LogTech 2019

Visibility is a Commodity

- Data is readily available from multiple vendors including most LSPs
- Small technical differences from vendor to vendor don't really differentiate
- Many vendors are not built to "play well with others" limiting true "end-to-end" capabilities

Orchestration is True Collaboration

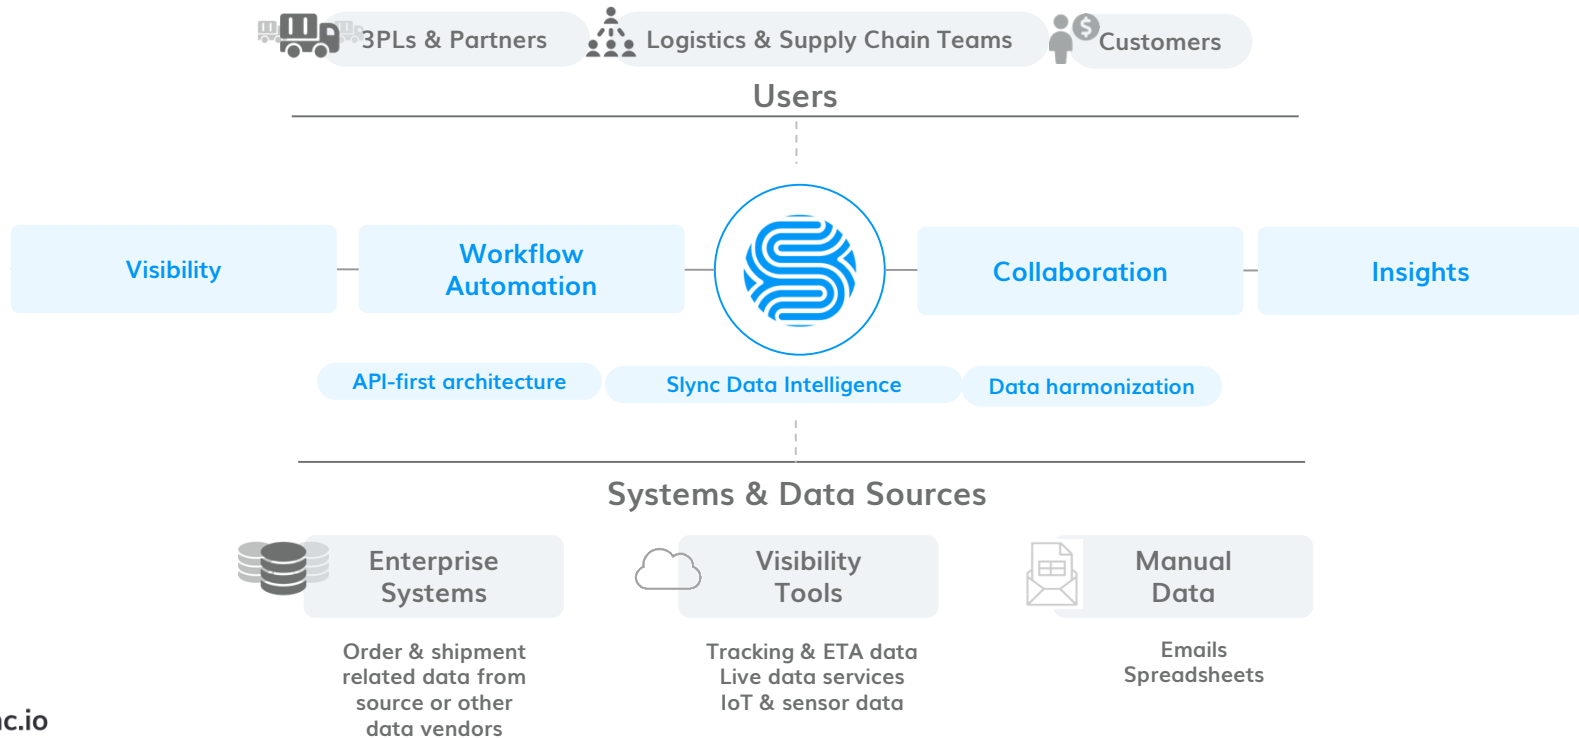

Visibility + Communication + Automation

Earlier Warning > Faster Resolution > Lower Cost > Higher C-SAT > Revenue Capture

High Level Overview of Logistics Orchestration™

A unified system to connect data and people

Thank you.
